Guys.

A victory is a victory but as I said yes you did win and without playing well but we have given instructions for you to follow which will only benefit you in the long run.

That is the difference between being a great team that will challenge for honours and being a good team full of best mates that will be their about but never reach the summit.

Only one listened in the first half and I would say 3 or 4 in the second.

You have a chance next week to get the performance right as the week after you will be tested against the might of Bohemians.
